

Surgery at THVC...

At THVC we offer elective sterilization, declaw and most soft-tissue surgeries. We also provide dental procedures. Our patients are monitored under anesthesia by a state-of-the-art VetSpecs monitor that tracks the patient's ECG, pulse, oxygen levels, and respiratory rate. We utilize high-quality anesthetics and pain medications to keep animals as comfortable as possible.

We have an agreement with Dr. Cal Kobluk, a board-certified veterinary surgeon from St. Cloud, to provide high-end surgical services on-site. We work with Marcia Swanson, CVT, to provide extended rehabilitation care for surgery patients.

Large Animal Services at THVC...

Dr. Justin Dahl provides limited ambulatory service for horses, cows, and other farm animals. In addition to routine preventative care visits (such as vaccination and Coggins Testing), he can provide limited diagnostic services (including on-site radiology) and limited on-site surgery as well. Dr. Dahl works out of the Grand Avenue office (628-0301).

Pharmacy Services at THVC...

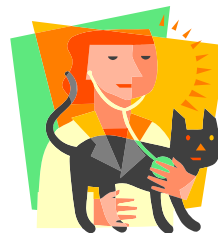

Our pharmacy allows our clients to obtain most medications on-site. We also can have Prescription Specialties in Duluth prepare any medications that we do not carry.

Medical Care for THVC Patients...

Open four days a week, THVC will provide consultation hours all day Mondays, Tuesday mornings, Wednesday afternoons, and Friday. Surgery is offered on Wednesday morning. We are closed on Thursdays.

We are capable of managing ill patients in-hospital with a wide array of equipment, including an intravenous infusion pump, up-to-date pain management protocols, pharmaceuticals for management of critical hospitalized cases, and a highly trained and caring staff devoted to doing everything they can to keep your pet comfortable. Dr. Lisa Nordquist offers acupuncture therapy through Grand Avenue Veterinary Clinic for cases in which it is an option, as well as stem cell therapy for dogs.

When our clinic is closed, our clients have access to the latest and greatest after-hours urgent care through Affiliated Emergency Veterinary Services, a centralized emergency clinic that serves the entire Twin Ports and Arrowhead region. AEVS features high end equipment and 24-hour weekend service with an on-site veterinarian and support staff to provide the absolute best care to patients that need hospitalization.

Two Harbors
Veterinary Clinic

Our Mission...

The mission of THVC is to provide high-quality veterinary care for all of our clients, using an honest and fair approach to provide the best care possible within the limits of the clients' goals for both outcome and financial capability.

About Us...

THVC opened its doors on June 2, 2008. The facility was the dream of Dr. Mary Schlangen, a Two Harbors resident that

wanted very much to be a beacon for her community. Dr. Schlangen was tragically killed by a drunk driver on August 10, 2007,

and never saw the realization of her dream. But her vision guides the mission of THVC, and her influence on the clinic's design and goal will always be a constant reminder of its importance to its community.

THVC is a satellite clinic of Grand Avenue Veterinary Clinic in West Duluth. Together, the two clinics combine to provide full medical and surgical services. THVC focuses on provision of small animal consultations and surgery to the Two Harbors community and the North Shore communities of Lake Superior.

Our Doctors...

**Robyn Ball, DVM
Minnesota '05**

Dr. Ball started working for THVC in 2008 after spending two years in Minneapolis. She provides services for companion animals. Her primary interest is in internal medicine. Dr. Ball resides in Two Harbors with her husband, Mark, two children Kaija and Eli, and a bevy of dogs, cats, goats, horses, and chickens!

**Elaine Nelson, DVM
Minnesota '05**

Dr. Nelson started working at THVC in May 2010 after working for a year in Cloquet and three years in the Twin Cities. She enjoys doing soft tissue surgeries as well as tackling difficult internal medicine cases.

She lives in Duluth and enjoys doing many athletic activities with her husband including: running, canoeing, biking, camping, and Nordic skiing. She loves dog training and enjoys competing in Agility with her Weimaraner, Xena. Her menagerie includes: Nika the Yellow Lab, Xena the Weimaraner, Midas the Bengal cat, and Angel the cockatiel.

Diagnostics at THVC...

THVC features both on-site diagnostic capabilities and satellite referral to Grand Avenue Veterinary Clinic in West Duluth, allowing us to make a diagnosis without delay.

We feature the Idexx VetTest analyzer, allowing us access to chemistry results within 30 minutes of animal's presentation in the clinic. Our lab also allows us to perform fecal analysis, cytology, and numerous other condition-specific tests.

Radiology cases are referred to GAVC in West Duluth, where a digital processor can provide superior-quality images that can then be accessed by THVC veterinarians remotely to provide continued local care.

We work with Dr. Ralph Weichelbaum, a board-certified radiologist from the Twin Cities, to provide ultrasound diagnostics. Dr. Weichelbaum performs both abdominal ultrasound and echocardiography.
